

Fellowes High School  
Mr. Brazeau  
CGC 1P1- Geography

You have just won the big hundred million dollar lottery. The Lottery Corporation won't give you your money until you tell them what you are going to do with it. You have decided to relocate your family, and you need to provide the Lottery Corporation with all of the necessary details. You must provide them with:

- a) The name of your city. Label your city on the map of Canada and place an X beside your city. Color the province that your city is in.
- b) Provide the grid location of your city. Add gridlines to your map, with the coordinates labelled in pencil.
- c) Provide the coordinates of longitude and latitude that your city is located at. Place the lines of longitude and latitude on your map in different colors.
- d) Provide the Hemisphere location. There will be a spot on your map to provide this detail.
- e) Provide the climate pattern of your area. Please describe your climate pattern in detail. Also provide a climate graph for the entire year for your city.
- f) Provide a precipitation graph the average amount of precipitation that can be expected every month.
- g) What landform region does your city fall in?. Please describe in detail.
- h) Explain the Bioregion of your city. Talk about landforms that may be found, water (lakes, rivers, soils {leached or calcified}), human population and actions in the area, describe the flora as well as the fauna found in the area.
- i) Talk about the ecozone of your city. What ecozone does your city fall in and the characteristics of the ecozone

Location of City

Grid Location:

Longitude and Latitude Coordinates: \_\_\_\_\_ and \_\_\_\_\_

Hemisphere Location: \_\_\_\_\_
